AI Powered Enterprise Multi Vendor Marketplace Development Proposal

Prepared For: Aman Ullah

Prepared By : Amdads Group

Project Duration : 4 Months (16 Weeks)

Estimated Budget : BDT 1,00,000

Proposal Version Version 1.0

Date August 2026

Executive Summary

Thank you for considering Amdads Group as your technology partner for developing your AI Powered Enterprise Multi Vendor Marketplace.

This proposal outlines our approach to designing and developing a secure, scalable, and modern marketplace platform capable of supporting multiple vendors, customers, administrators, and delivery partners through a single integrated ecosystem.

Our objective is to create a marketplace that delivers an excellent user experience while providing businesses with powerful management tools and intelligent automation. The proposed solution combines modern web technologies, cloud architecture, and Artificial Intelligence to build a platform that is reliable, efficient, and ready for future growth.

The initial development phase will focus on delivering a Minimum Viable Product (MVP) within the agreed four month timeline and estimated budget. The architecture will be designed to allow additional enterprise features to be integrated in future phases without requiring major redevelopment.

This proposal presents the overall project vision and recommended implementation approach. Specific implementation priorities may be refined during the planning phase to ensure the best balance between business requirements, project timeline, and available budget.

Amdads Group is committed to delivering a high quality solution while maintaining transparency, security, and long term maintainability throughout the project lifecycle.

Project Overview

The objective of this project is to design and develop an AI Powered Enterprise Multi Vendor Marketplace that enables multiple businesses to operate under one centralized digital commerce platform.

The marketplace will provide dedicated interfaces for customers, vendors, administrators, and delivery personnel while integrating modern commerce technologies, intelligent automation, and secure payment systems.

The platform will support both physical and digital products while maintaining flexibility for future business models such as wholesale commerce, subscriptions, bookings, rentals, and international expansion.

The solution will be developed using a modular architecture that supports continuous improvement without disrupting existing operations.

The primary goal of Version One is to establish a stable, production ready marketplace capable of supporting day to day business activities while preparing the technical foundation for future enterprise enhancements.

Project Objectives

The objectives of this project include:

Develop a secure and scalable multi vendor marketplace.

Provide an intuitive shopping experience for customers.

Enable vendors to independently manage stores, products, and inventory.

Create a centralized administration system for complete marketplace management.

Implement secure authentication and authorization mechanisms.

Integrate trusted payment gateways.

Support delivery and logistics management.

Leverage Artificial Intelligence to improve productivity and customer engagement.

Deliver responsive web applications with Progressive Web App support.

Develop a flexible architecture capable of supporting future enterprise modules.

Maintain high standards of performance, reliability, and security.

Provide comprehensive documentation and deployment support.

Project Scope

Version One Scope

The initial phase of the project focuses on delivering the core functionality required to successfully launch the marketplace.

The primary modules included are:

Marketplace Management

Vendor Management

Customer Management

Product Management

Order Management

Inventory Management

Payment Integration

Delivery Management

Administrative Dashboard

Artificial Intelligence Features

Reporting and Analytics

Security Framework

Progressive Web Application

Cloud Deployment

AMDADS GROUP

Proposal Statement

This proposal represents the recommended implementation approach prepared by Amdads Group based on the information currently available.

The final implementation scope, feature prioritization, technical architecture, timeline, and resource allocation may be refined during the project planning phase following detailed business analysis and mutual agreement between the Client and Amdads Group.

Any functionality not explicitly included within the approved Version One scope shall be considered outside the current agreement and may be implemented in subsequent development phases through a separate scope approval process

Part 2

7. Technology Stack

The marketplace will be developed using modern and scalable technologies to ensure high performance, security, and future expansion.

Frontend

- Next.js

- React
- TypeScript
- Tailwind CSS

Backend

- NestJS
- TypeScript
- REST API

Database

- PostgreSQL
- Redis Cache

Mobile

- React Native

Infrastructure

- Docker
- Cloudflare CDN
- Nginx
- Cloud Hosting

Development Tools

- GitHub
- Supabase
- Vercel
- CI/CD Pipeline
- Monitoring & Logging

AMDADS GROUP
INNOVATE • INTEGRATE • INSPIRE

8. System Architecture

The platform will follow a modular and scalable architecture consisting of:

- Web Application
- REST API Services
- Authentication Service
- Business Logic Layer
- Database Layer
- Cloud Infrastructure

This architecture allows the system to grow without major redevelopment and supports future enterprise modules.

9. Artificial Intelligence Features

Artificial Intelligence will be integrated to improve productivity and customer experience.

Customer AI

- AI Product Recommendation
- AI Smart Search
- AI Customer Support Chatbot
- AI Translation

Business AI

- Sales Analytics
- Demand Forecasting
- Smart Reporting

Additional AI modules can be integrated in future phases according to business requirements.

10. Security

Security will be implemented using industry best practices to protect users, business data, and financial transactions.

Security Features

- OTP Authentication
- Secure Login
- Role Based Access Control
- JWT Authentication
- Activity Logs
- Audit Logs
- Rate Limiting
- HTTPS Encryption
- Automatic Backup
- Fraud Protection

Regular security updates and monitoring will be performed throughout the project lifecycle.

11. Payment System

The marketplace will support secure and reliable payment methods for both customers and vendors.

AMDADS GROUP
INNOVATE • INTEGRATE • INSPIRE

Supported Payment Methods

- SSLCommerz
- bKash
- Nagad
- Rocket
- Visa
- Mastercard
- Cash on Delivery
- Wallet Payment

The system will also support payment verification, refund processing, and transaction history management.

12. Development Methodology

The project will follow an Agile development approach to ensure flexibility, transparency, and continuous improvement.

Development Phases

- Requirement Analysis
- System Design
- Development
- Testing
- Deployment
- Training
- Project Handover

Development Process

- Sprint Based Development
- Regular Progress Updates
- Client Review and Feedback
- Continuous Testing
- Performance Optimization
- Final Production Deployment

This methodology ensures the project is delivered efficiently while maintaining quality, stability, and scalability.

Part 3

13. Project Timeline

The estimated development duration for Version One is **4 Months (16 Weeks)**.

Phase	Duration
Foundation + Multi-Vendor Marketplace	Month 1
POS + Order Management + Advanced ERP (Branch + Inventory)	Month 2
Automation + Reseller + Tracking+ Marketing, Polish & SaaS Finalization	Month 3
Final Delivery	**Month** 4

The timeline may be adjusted if project requirements change or if approvals and required resources are delayed.

14. Project Budget

The estimated budget for the development of Version One is **BDT 1,00,000**.

Payment Schedule

- 20% Advance Payment
- 20% After Month 1 Completion
- 20% After Month 2 Completion
- 20% After Month 3 Completion
- 20% Upon Final Delivery and Project Approval

Any additional features outside the approved scope may require additional budget and timeline adjustments.

15. Project Deliverables

Upon successful completion of the project, Amdads Group will deliver:

- Responsive Web Marketplace
- Admin Dashboard
- Vendor Dashboard
- Customer Dashboard
- REST API
- Payment Gateway Integration
- Source Code
- Database Structure
- Technical Documentation
- Deployment & Production Setup
- User Training and Project Handover

AMDADS GROUP
INNOVATE • INTEGRATE • INSPIRE

Part 4

16. Terms & Conditions

This proposal outlines the estimated scope, timeline, and budget for Version 1 of the project. Any additional features, integrations, or modifications requested after project approval may require additional time and cost. The estimated project duration is four months, subject to timely approvals and required resources from the client.

17. Client Responsibilities

The Client shall provide all necessary project information, branding materials, product data, API credentials, and timely approvals throughout the development process. Delays in providing required resources or feedback may affect the project timeline.

18. Scope Limitations

This proposal covers only the agreed Version 1 development scope. Features, integrations, or customizations not specifically included in the approved scope will be considered future enhancements and may require a separate agreement.

The final implementation may be adjusted by Amdads Group if an alternative technical approach provides better performance, security, scalability, or long-term maintainability without affecting the project's primary objectives.

20. Risk Disclaimer

Amdads Group is committed to delivering the project according to the agreed scope, timeline, and budget. However, the company shall not be held responsible for delays or limitations resulting from factors beyond its reasonable control, including third-party service providers, payment gateway approvals, cloud infrastructure issues, API policy changes, government regulations, force majeure events, or delays caused by the Client.

AMDADS GROUP
INNOVATE • INTEGRATE • INSPIRE

21. Acceptance Criteria

The project will be considered successfully completed when:

- The agreed Version 1 features have been implemented.
- The web application functions as intended.
- Core modules have been tested and approved.
- The system has been deployed to the production environment.

- The Client has completed final acceptance and all agreed payments.

22. Conclusion

Amdads Group appreciates the opportunity to present this proposal and looks forward to building a secure, scalable, and future-ready AI Powered Enterprise Multi Vendor Marketplace.

Our goal is to deliver a high-quality solution that supports your current business objectives while providing a strong foundation for future growth. We are committed to maintaining transparency, quality, and professional standards throughout the project.

We believe this project will become a valuable digital asset for your business, and we are excited about the opportunity to work together to make this vision a reality.
