1. Executive Summary

Zibonbaba.com is proposed as a complete next generation Multi Vendor E Commerce Marketplace designed to empower businesses, entrepreneurs, and customers through a single digital platform. The system will combine online shopping, vendor management, inventory management, warehouse operations, business analytics, customer relationship management, and enterprise level administration into one integrated ecosystem.

The platform is designed to be secure, scalable, SEO friendly, mobile responsive, and capable of supporting thousands of vendors and customers. It will provide an intuitive shopping experience for customers while enabling vendors to efficiently manage every aspect of their business from a centralized dashboard.
